

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

FP Foresight Global Real Infrastructure Fund, a sub-fund of FP Foresight OEIC

Class A Accumulation Shares (GBP) (ISIN GB00BK0T9T82)

Class A Income Shares (GBP) (ISIN GB00BK0TB032)

The Fund is managed by FundRock Partners Limited.

Objective and investment policy

Objective:

The Fund aims to grow, over any 5 year period, by more than 3% per annum above the rate of UK inflation (as measured by the UK Consumer Prices Index). There is no guarantee that the Fund will achieve a positive return over this, or any other, period and you may not get back the original amount you invested.

Policy:

- The Fund will invest directly in the shares of companies (including listed Investment Trusts, Real Estate Investment Trusts (REITs), ETFs and other investment company structures depending on the relevant jurisdictions) or units of Master Limited Partnerships that, in each case, are publicly traded (listed) on stock exchanges in developed markets (meaning North America, Western Europe and Asia Pacific); and that own or operate real infrastructure or renewable energy assets anywhere in the world. Such companies' revenue streams are typically directly or indirectly supported by long term government or public sector contracts and government supported initiatives.

- No more than 50% of the Fund by value will be invested in shares that have a primary listing in a single country. The Fund may also invest in cash for liquidity and cash flow purposes and to pay fund expenses and redemptions.

- The Fund may invest in certain financial contracts (derivatives (contracts where the value is linked to the expected future price movements of an underlying asset) or forward transactions) for efficient portfolio management (including hedging) (to reduce costs and/or the overall risk of the Fund).

- The Fund will only invest in the shares of a company if the investment manager in its discretion considers that the company delivers a net social or environmental benefit.
- The Fund is actively managed.

- The Fund is actively managed.

Benchmark:

The UK Consumer Prices Index is a target benchmark against which the performance of the Fund has been set ('Target Benchmark').

The Target Benchmark was chosen by the ACD because the Fund will invest in investments that are inflation-linked (infrastructure and renewable energy assets are typically inflation-linked as a result of benefiting from government or public sector subsidies, concessions or service provision contracts which are themselves normally inflation-linked).

Other information:

- You can buy and sell shares between 9am and 5pm on most business days when the London Stock Exchange is open for a full range of services.

- The Fund's base currency is Pounds Sterling.

- We carry out investors' requests, to buy, sell or switch, at midday on each business day (which excludes UK public holidays). If we receive a request after midday, we deal with it on the next business day.

- If you hold accumulation shares, income from investments in the Fund will be rolled up into the value of your shares.

- If you hold income shares, income from your investment is paid out to you four times a year.

- Recommendation: the Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

- There can be no guarantee that the objective of the Fund will be achieved.

- On encashment, particularly in the short-term, you may receive less than the original amount invested.

- Charges applicable to the Fund accrue daily, therefore an equivalent rise in the value of shares is required before the original investment can be recovered.

Risk and reward profile

Lower Risk

This indicator above is not a measure of the risk of capital loss, but an estimated measure of the Fund's price movement over time. It is based on historical data, and thus may not be a reliable indication of the future risk profile of the Fund.

- The risk category shown is not guaranteed to remain unchanged and may shift over time.

- The lowest category does not mean 'risk free'.

- The Fund appears as a '6' on the scale. This is because it invests in the infrastructure industry and the Fund's simulated and/or realised return has experienced high rises and falls historically.

- The risk indicator is not related to the risk scale number of the Fund.

The indicator does not take into account the following risks of investing in the Fund:

- The Fund relies on other parties to fulfil certain services, investments or transactions. If these parties become insolvent and fail to meet their obligations, it may expose the Fund to financial loss.

- Infrastructure companies may be subject to a variety of factors that may adversely

affect their business or operations, including high interest costs in connection with capital construction programmes, high leverage, costs associated with environmental and other regulations, the effects of economic slowdown, surplus capacity, increased competition from other providers of services, uncertainties concerning the availability of fuel at reasonable prices, the effects of energy conservation policies and other factors.

- Exchange Rate Risk - Fluctuations in exchange rates may cause the value of your investment to rise or fall.

- Management Risk - Investment management techniques that have worked in normal market conditions could prove ineffective or detrimental at other times.

- Liquidity Risk - Certain securities could become hard to value, sell at a desired time and price, or cease to trade altogether.

- The investments of the Fund are subject to normal market fluctuations and other risk inherent in investing in securities. Appreciation in the value of investments is not guaranteed.

- The Fund's portfolio will be focused on equities within the Global Infrastructure Sector. Whilst increasing the potential reward, the nature of a more focused portfolio can increase risk. As such, the returns may be more volatile and will be impacted more by fluctuations in the value of underlying stocks within the Global Infrastructure Sector.

For full details of the Fund's risks please see Section 5 of the Fund's Prospectus, which is available at www.FundRock.com. * The methodology for calculation of synthetic expense ratio has changed. Following guidance issued by the Investment Association on 2 July 2020, the synthetic OCF calculation has been expanded to include closed ended vehicles such as investment trusts.

The entry and exit charges shown are maximum figures. In some cases (including when switching to other funds) you might pay less. You can find out actual entry and exit charges from your financial adviser.

The ongoing charges figure is based on expenses for the period ending 30 November 2022. Ongoing charges may vary from year to year. The ongoing charges figure includes any portfolio transaction costs which the Fund pays to its service providers (e.g. to the Fund's custodian) and any entry/exit charges the Fund pays when buying/selling units in another fund. In general, however, the figure excludes other portfolio transaction costs.

For more information about charges please see Section 7 of the Fund's Prospectus, which is available at www.FundRock.com. You may also request the Prospectus from the Fund's Administrator at FundRock Partners Limited - FP Foresight, PO Box 12766, Chelmsford, CM99 2FG or, during normal business hours on 0330 123 3721. A Supplementary Information Document (SID) giving general details about the Fund is also available at www.FundRock.com or on the above number.
